

## Probiotic Chute & Dumpster Cleaner (formerly Devour) eliminates offensive garbage odors with grease loving enzymes.

Neutron's Probiotic Chute and Dumpster Cleaner is formulated as a stabilized enzyme concentrate for the purpose of quickly and efficiently breaking down a variety of organic materials.

**Advantages:** The enzymes specifically target and accelerate the breakdown of large particles of fats, oils, greases, starches and proteins by helping to move solids out faster, which in turn will help to eliminate odors faster. These enzymes have been designed using innovative research with validated and verified results.

Probiotic Chute & Dumpster Cleaner is environmentally safe with no VOC's and is non-flammable.

**Perfect for:** Schools • Hospitals • Hotels • Universities • Nursing Homes • Day Care Centers • Rendering Plants • Grocery Stores • Airports • Offices • Garbage Trucks • Apartments • Parks and Recreation Areas • Outdoor Restrooms

If you deal with garbage, you need Probiotic Chute & Dumpster Cleaner.

4 gallons - #128781

20 gallon drum - #128782

55 gallon drum - #128783

### RECOMMENDED USES AND DILUTION RATIOS

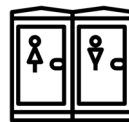

**Dumpsters/Compactors:** For heavy odors, use 1 part Probiotic Chute and Dumpster Cleaner to 5 parts water. For regular odors, use 1 part to 10 parts water. Add diluted mixture to a pump sprayer, wet down inside and under dumpster periodically during the day as new trash is added and odors appear. Make a new mixture each day.

**Compost Piles:** For heavy odors, use 1 part Probiotic Chute and Dumpster Cleaner to 5 parts water. For regular odors, use 1 part to 10 parts water. Spray compost piles. Make a new mixture each day.

**Loading Dock Floors:** For wet mopping: add 2 - 4 oz Probiotic Chute and Dumpster Cleaner per gallon of water in mop bucket, wet mop the floor and let dry. For pump sprayers: add 1 part Probiotic Chute and Dumpster Cleaner to 5 parts water for heavy odors. For regular odors, use 1 part to 10 parts water. Fill pump sprayer with diluted mixture, wet down floor and let air dry. Make a new mixture each day.

**Portable and Chemical Toilets:** To re-charge toilet and hold tanks, add 8 oz of Probiotic Chute and Dumpster Cleaner per 5 gallon of recharge water. Add 2 oz as needed to control odor between pumping.

**Trash Chutes:** For heavy odors, use 1 part Probiotic Chute and Dumpster Cleaner to 5 parts water. For regular odors, use 1 part to 10 parts water. Add diluted mixture to a pump sprayer, wet down inside of trash chute. Repeat as new odors emit from trash. Make a new mixture each day.

**Septic Systems & Commercial Septic Tanks:** Add 8 oz of Probiotic Chute and Dumpster Cleaner weekly by flushing down toilet. For problem systems add 16 oz weekly until problem is resolved and then add 8 oz weekly to maintain the system.
