

# BUG BURST

**Insecticide refill for automatic dispensers. Metered spray kills flying pests automatically - both indoors and out!**

- **Powerful:** Kills flies, mosquitoes, gnats and small flying moths. Use one dispenser for every 6,000 cubic feet of unobstructed space.
- **Versatile:** Can be used both indoors and outdoors. Refills fit into most automatic time-release cabinets — including Neutron's 24/7 and Programmable models.
- **Saves Money:** Select your program once, and the automatic dispenser takes care of the rest. Bug-Burst does not give off an offensive odor like many other bug sprays, so people can work and do business while treatment continues in the area.
- **For Use In:** Food handling and food preparation areas of restaurants and food processing plants, stores, farms, dairies, barns, kennels, factories, schools, hotels, motels, offices, ships, planes (cargo area), supermarkets, food warehouses, bottling plants, hospitals, nursing homes, daycare centers, milk and egg handling areas of dairies and chicken houses. Refer to product label for specific use instructions in food prep and food processing areas. Product should not be used in nurseries or rooms where infants, ill or aged persons are confined.

12 cans (8.1oz) per case.  
#124668

Refills fit into most automatic time-release cabinets — including Neutron's 24/7 and Programmable models. When using the automatic dispenser product sprays every 15 minutes and one can of Bug-Burst lasts approximately one month.
