ACC Aerosol Coil Cleaner

Cleans cooling coils in air conditioning units and radiators

Powerful: Penetrates, cleans and deodorizes dirty cooling coils in air conditioning units and car radiators. Expanding foam reaches through fins and around coils to coat metal surfaces and drive out dirt and grime.

Saves Money: Improves fuel economy; cooling units run more efficiently when they're clean.

Saves Time: Just turn the unit off, expose the coils and spray with ACC. No rinsing needed- designed specifically for applications where rinsing is impossible.

Safe and Versatile: Contains no acids, caustic, toxic fumes or odors. Perfect when you need a low-odor product or when safety or environmental regulations prevent the use of acid- or caustic-based chemicals. Use on window and roof-top air conditioners, ice machines, refrigerators, freezers, radiators and other cooling coils.

Case of 12 Cans (18-oz): #121694-12
