

ZERO IN™ WHAM

Total release, hands-off insect fogger

- Provides a hands-off method for killing both crawling and flying insects (both adult and larvae) on contact. Simply activate a can in an empty room and leave.
- Limits user's exposure to the product, making it safer than manual spray operations. Won't leave a sticky or oily coating or damage most surfaces.
- Visible dry fog kills bugs where they hide - behind baseboards, in openings around pipes, under cabinets, around door and window frames, everywhere.
- Highly-concentrated. One 6 ounce can treats up to 4,000 cubic feet of unobstructed area (a room 20' x 25' with an 8 foot ceiling). Kills ants, cockroaches, crickets, fleas, flies, mosquitoes, rice weevils, saw-toothed grain beetles, small flying moths and ticks.

Case of 12 aerosol cans (6 oz) #103221

HOW TO USE:

Step 1: PREPARATION – Open cupboards, cabinets, trunks, and doors to area to be treated to allow maximum kill in all areas where insects can hide and breed. Close outside doors and windows and shut off fans and air conditioning to maximize killing power of fog. Remove pets, birds, and tightly cover or remove fish bowls and aquariums before spraying. Cover waxed wood floors and waxed furniture in the immediate area surrounding the fogger (newspapers may be used). Remove or cover exposed foods, dishes, utensils or food handling equipment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Shut off electrical appliances. Do not place activated fogger in a cabinet or under a counter or table. Do not use fogger in an area less than 100 cubic feet.

Step 2: ACTIVATION OF FOGGER – SHAKE WELL JUST BEFORE USING. Place a section of newspaper on floor in center of room to be treated. NOTE: Do not place fogger on water-stainable surface. Tilt can opening away from face and depress tab firmly with thumb until it clicks in locked position. Aiming spray away from face, set fogger on newspaper, leave room and close door. After activation, leave room or house at once. Keep area closed for 2 hours (30 minutes for flying insects) before airing out. Open all doors and windows and allow to air for 30 minutes. Repeat spraying in two weeks or when necessary.
