

## Meta Air Fragrance-free Odor Remover

### Convenient and effective scent-free odor neutralizing agent.

**Powerful:** Meta Air is a convenient and effective scent-free odor neutralizing agent. This RTU formula is tough on odors, but gentle to senses, surfaces and fabrics. Its non-toxic, VOC-compliant formula has no residual fragrance or chemical scent, making it ideal for use in shared spaces or places with fragrance sensitivity. Meta Air utilizes Molecule Altering Factor technology that pairs with malodors on a molecular level and neutralizes them so the odor is no longer recognized by the nose. Product should be sprayed finely into the air or onto fabric to eliminate bad smells. Multiple sprays may be necessary to completely neutralize odors.

**Unscented:** Unlike other competitor products, no fragrance or chemical scent will be left behind.

**Use on:** Free of dye and safe for use on fabric, carpet, upholstery and other surfaces that commonly trap odors. Spray it into the air to rinse away foul odors or directly onto the source for best performance.
